GRILLO

FRONT DRIVE and REAR DRIVE gait trainer

It stimulates and helps the step pattern. It trains the user to maintain the balance of the trunk and pelvis. It organizes a wider and structured vision of space, enhances the perception of distances and environment that surrounds the user. It develops physical self-sufficiency and psychological independence by experimenting the possibility of acting independently without the help of other people.

Grillo compensates the user lack of balance thanks to its ergonomic support and wide base, it allows the user to concentrate his/her residual abilities on walking.

The wide range of components and supports offers maximum versatility. All accessories are interchangeable quickly and without the use of tools to suit different clinical pictures.

Product registered FDA (USA)
